

## What's the most common programming language used by everyone?

```
In [1]: from tools import data_loader
import pandas as pd
```

Here we import the data\_loader module to help us pre\_load the data into dataframe and do some cleaning beforehand.

```
In [2]: df = data_loader.load_data("Developer Kaki _ Developer Salary Surv
```

```
In [3]: df.tech_used #The column we are interested to investigate
```

```
Out[3]: 0                                The Internet
1      Angular, NestJS, Laravel, WordPress, NextJS
2                                Configura Magic
3                                Terminal, Zendesk, slack
4                                .NET
...
716                                .net, c#
717                                Many
718      Reactjs, vuejs, .net core, cubejs, nodejs, kub...
719                                Mulesoft, cloud
720                                Laravel, vue
Name: tech_used, Length: 699, dtype: object
```

Get the frequency of each tech and sort them from most common to least common

```
In [4]: from tools import frequency_counter
```

```
In [5]: counter_info, wordcloud = frequency_counter.freq_counter(df)
# frequency counter will automatically use df.tech_used as referen
```

```
In [6]: counter_info.most_common()
```

```
